

Swarovski crystal coatings

Some crystal coatings have very particular colors, processes and shades such as Crystal Transmission, Volcano, Aurum, Shimmer and Dorado. Coatings can only be applied to a part of an object, and are called AB (Aurora Borealis), others are coated twice and therefore are designated AB 2X, Dorado 2X, etc.

The page features decorative floral illustrations in the corners. In the top right, there is a branch with clusters of red and purple berries. In the bottom left, there is a large pink lily flower with green leaves and a stem with smaller pink buds and leaves. In the bottom right, there is a branch with orange and pink leaves and a red rosehip.

In 2004, Swarovski released Xilion, a copyrighted cut designed to optimize the brilliance of roses (flat-backed components) and Chatons (diamond cut).
