

Forget Me Not

The forget-me-not flower is usually deep blue in color, but can also be pink and white.

The story of this beautiful flower originates from two very similar legends, one Greek and the other Austrian.

The Greek version tells that a knight, walking along the banks of a river with his sweetheart, to pick up a bunch of flowers, unbalanced

*by the heavy armour, fell into the
water.*

*Before drowning he managed to
throw flowers to her lover asking
her not to forget him.*

*The flowers of the bouquet at that
point turned into the "Don't forget
me" and became the symbol of
fidelity and eternal love.*

*Even today it is customary to give
"Don't forget me" for special
occasions, anniversaries, and
birthdays.*

The message

*Il messaggio è quello di dimostrare
amore eterno o un grandissimo
affetto che durerà nel tempo. is to
demonstrate eternal love or a great
affection that will last over time.*
