

The flower "Non Ti Scordar Di Me" in History

Tiny and delicate wild flower with deep blue petals, the forget-me-not has always been considered a symbol of memory, love and hope; It blooms in spring on the so-called 'grass of love', a seedling that grows low, secluded and inconspicuous. During the Victorian era (1837-1901) the interpretation of the language of

*. flowers linked it to the fidelity
of the true lasting and
unforgettable love feeling, which is
why the "Forget Not Me" adorned
the clothing of women in love.
In this sense, there was an
erotic exchange of
forget-me-not flowers between
Lady Chatterley and her lover, in
a moment of intimacy described in
the novel *Lady
Chatterley's Lover*.*
